

SME Development Program

Development of e-IBS Score Talent Workers

It is important for SME companies possess well trained talents that are skilled in relevant subject matter, in order to maintain productive and cost efficient. For companies in the Architecture, Engineering/Manufacturing & Construction (AEC), it is important for them to keep up to date in the Industrialised Building System (IBS) policy by the government. Under the Construction Industry Transformation Program, IBS has also been started to be made compulsory at certain IBS Score for private projects beginning 2018, following the earlier instruction for public projects. This has created demand in IBS usage as well as IBS Score-related training. The current Covid pandemic brings more challenges to SMEs to equip their staffs with IBS Score knowledge and infrastructure. Without support in Talent Management related to staffs development in IBS knowledge, more SMEs will be left behind.

In this training, knowledge in IBS and IBS Score will be shared. Besides the manual calculation, the participants will also be exposed with BIM-based IBS Score submission, which constitutes a significant point in IBS Score submission. The participants from the SMEs will be equipped with a full license of Malaysian-made Revit IBS Score software, which they can utilise in project submissions thus increasing their productivity and quality of work. Being a recently developed tech, this is the only training available that offer BIM-based IBS Score submission.

CCD and CPD points from various Boards will be applied for the benefits of participants and companies.

7-day training / Fully sponsored by HRDF* / IBS Software provided / Allowances

For all: Certificate of Course Attendance. For those who passed test: Revit IBS Score Certificate

Objectives

1. To focus on Talent Management towards developing employees that are IBS savvy
2. To provide knowledge in manual IBS Score calculations based on CIS 18: 2018 and MS1064: 2018
3. To provide BIM-based IBS Score calculation skills that can be used for e-submissions)
