

# TVETMETaverse

MULTIPLAYER XR FOR IBS CONSTRUCTION TRAINING

## A Construction Technology tool developed in-line with CIDB Malaysia's Construction 4.0 : A Guide For Digital Transformation

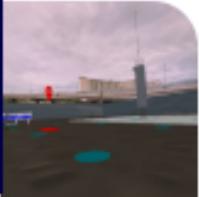

### ABOUT TVETMETaverse

First introduced by Innovacia in 2019, TVETMetaverse is now a rich extended reality (XR) platform for construction component installation process using collaborative technology,

The first of its series is the Precast Concrete Installer Level 2 which is based on the National Occupation Skill Standard (NOSS) produced by Department of Skills Development. TVETMetaverse digitalises the traditional construction-based TVET training programs with new technology; besides reducing time and costs.

### EXISTING XR TRAINING SIMULATOR SPACES
